EU4Health Programme

EU4Health – a vision for a safer and healthier
European Union 2021-2027

= 275% Increase in Health Funding!

EU4Health is the EU's response to this (COVID-19) challenge. By investing **€9.4 billion**, this programme will:

- boost EU's **preparedness** for major cross border **health threats**
- make sure health systems are resilient and can face epidemics as well as long-term challenges such as an ageing population and inequalities in health status.

Main objectives of the EU4Health Programme

- protecting people in the EU from serious cross-border health threats and improving crisis management capacity;
- making medicines, medical devices and other crisis relevant products, available and affordable and supporting innovation;
- **strengthen health systems and the health care workforce**, including by investing in public health, for instance through **health promotion and disease prevention programmes and improving access to healthcare.**

EU4Health: Specific Objective Six

Support action for the surveillance, prevention, diagnosis and treatment and care of non-communicable diseases, **and notably of cancer**

What does this mean for EONS?

- Committed funding to the EU Beating Cancer Plan
- Potential Framework Funding for Cancer societies: call due at end of 2020 or Spring 2021
- An 'open ear' among EU Policy makers to the cancer community

European Cancer Mission Board

- A Board of European experts – covering cancer research, innovation, policy, healthcare provision and practice – (hereafter Mission Board) to define an ambitious and measurable goal with a substantial impact on and relevance for society and citizens of Europe.
- The Commission also asked the Board to propose a coherent set of actions to achieve this goal in a set timeframe. These actions will be implemented through Horizon Europe and other instruments of the European Union (EU) and its Member States, and aligned with other initiatives at EU and Member State level.

Cancer Mission Board Mid-term Evaluation

Key Points:

- **Launch UNCAN.eu – a European Initiative to Understand Cancer**
- **Develop an EU-wide research programme to identify (poly-) genic risk scores**
- **Support the development and implementation of effective cancer prevention strategies and policies within Member States and the EU**
- **Optimise existing screening programmes and develop novel approaches for screening and early detection**
- **Advance and implement personalised medicine approaches for all cancer patients in Europe**
- **Develop an EU-wide research programme on early diagnostic and minimally invasive treatment technologies**
- **Develop an EU-wide research programme and policy support to improve the quality of life of cancer patients and survivors, family members and carers, and all persons with an increased risk of cancer**
- **Create a European Cancer Patient Digital Centre where cancer patients and survivors can deposit and share their data for personalised care**
- **Achieve Cancer Health Equity in the EU across the continuum of the disease**
- **Set up a network of Comprehensive Cancer Infrastructures within and across all EU Member States to increase quality of research and care**
- **Childhood cancers and cancers in adolescents and young adults: cure more and cure better**
- **Accelerate innovation and implementation of new technologies and create Oncology-focused Living Labs to conquer cancer**
- **Transform cancer culture, communication and capacity building**
