Dear member,

If you are currently living with advanced/metastatic breast cancer, we would like to invite you to participate in a short survey (<https://forms.office.com/e/EEp2H3aJVe>)

The ABC Global Alliance has partnered with AstraZeneca to conduct a survey that aims to understand the level of knowledge people living with advanced/metastatic breast cancer have about breast cancer, and how healthcare teams discuss this with their patients. The anonymous data gathered from this survey will be used to gain a better understanding of educational needs for those living with advanced/metastatic breast cancer, and subsequently help develop work streams to address patient needs.

Your participation in this survey is entirely voluntary, none of your responses can be linked back to you – the survey is anonymous and no personal data attributable to you will be processed. A third-party provider will analyse and process the information gathered from survey respondents.

Please find the link to the survey here, this should take **approximately 15 minutes to complete**:
